CSD and Traffic Calming correlation?
CSD – Context Sensitive Design
Woonerf

European engineers have long been puzzled by American road design. Americans engineer their roads to accommodate a fast speed, and then spend countless millions of dollars trying to enforce a lower speed limit.

Local Road Research Board (LRRB)
The LRRB sponsors research and implementation projects to:

LRRB Study – Traffic Calming

• Previous research
  – Synthesis of traffic calming devices
  – Minnesota usages; simulation of effectiveness

• Goals of this phase
  – Standardized data gathering for use in measuring the effectiveness of the traffic calming devices
  – Provide an online resource of MN experiences

• Available online at: mn-traffic-calming.org
